CareerSure Game Designer

A good artist can put pencil to paper – or work on a computer – and create a mighty superhero. He might admire his work for some time and then file it away. But a gaming artist is luckier. He brings his characters to life – making them play, fight battles, vanquish enemies – do whatever he wants. Making a video game is as interesting as playing it. “When you show the blueprint of the game to your team leader, it has to be projected as a complete source of entertainment even when it exists in the form of a few sketches on a piece of paper”.

There was a time when we would play video games at either game parlours or on our PCs. Over the last decade, however, there has been a spurt in newer technologies and mediums supporting the gaming industry, like smart phones, networking sites, consoles like Xbox and Sony PlayStation and so huge career potential has also unlocked.

Game Industry is one of the biggest grossing and high paid industry, Everybody who wants to become game developer knows about its growth and career benefits after becoming a game developer.

DID YOU KNOW?

- ▶ There are 2.3 billion hardcore gamers in the world.
- ▶ With 2.3 billion gamers, gaming is the biggest entertainment industry in the world. Bigger than the film and music industries. Gaming is huge, and its accelerated growth does not seem to slow down. The video game industry's revenue is higher than any other in the entertainment sector. Therefore it's safe to say games rule the entertainment business. The video games industry has generated more than \$152 billion in 2019.
- ▶ Dota 2 players received over \$177 million in tournament prizes.
- ▶ League of Legends is the most popular game in world. gaming industry is not only dominated by male community over 45% of US gamers are women. RPGs and shooters are the most played genres on all platforms.
- ▶ Over 66% of game studios are currently making games for PC. Almost 38% worked on a mobile game for smartphones and tablets. 31% of all studios were developing a game for Playstation 4/Pro, while 28% were working on an Xbox game. Android is the preferred OS for creating mobile games.
- ▶ Deus EX Game predicted the 9/11 attacks - Deus EX was released 19 years ago – in 2000. There are sections of the game where New York is visible. Interesting enough, the WTC twin towers weren't there. Early in the game's storyline, a terrorist attack occurred.
- ▶ The top earner in the free-to-play market made its creators \$2.4 billion. The Battle Royale PvP mode of Fortnite is the undisputed champion for 2018. The second place award goes to Dungeon Fighter Online & League of legends has earned \$1.5+ billion each.
- ▶ The gaming video content market was \$5.2 billion in 2018. Can you believe how much money this industry makes? All this revenue comes from just streaming the most popular games. Twitch stats reveal revenue was at \$1.6 billion, leaving YouTube second with \$1.2 billion, despite the latter's enormous audience.
- ▶ Did you know that around 50 new games are released everyday in gaming market. Last year (2018) 9050 new games were released on Steam alone. With Steam's database now featuring as many as 28,977 games, gamers have plenty of options.
- ▶ 56% of gamers play multiplayer games at least once a week. According to the video games statistics for 2018-2019, 55% of gamers say video games help them connect with their friends. Almost half say it helps their family spend more time together.

Our Student Speak

Real Google reviews of our young aspirants. Unbiased reviews are always better to achieve the best for our students

“ Many other schools come and go but this is the only institute which teaches quality work. faculty guides you to be one of the greatest and help you to pursue that career option. The faculty have been the best in the industry and helps students like us to become it. IT HAS LEFT Many Institutes behind LOVE TO BE A PART OF IT.”

★★★★★ — Hitanshu Lodhiya
GAMEPL's Student

“ I have seen several Animation schools but I must say this School is in a league of itself. It just doesn't teach you the tools, software, but concentrates more on the art behind it. The faculty are awesome in the sense they want to inspire you and mentor you into becoming great artist and not just software operators....loved to be a part of it.”

★★★★★ — Manojit Kandar
GAMEPL's Student

“ A very good place to learn the designing skills. Teacher are very good. They teach with their own experience. But the infrastructure of my branch is average due to one of the oldest branch ... REST EVERYTHING IS GOOD.”

★★★★★ — Sagar Dulgach
GAMEPL's Student

“ Awesome place to learn, grow, and to understand the industry from inside out. Its not like the other typical classes its different, Environment is very productive.”

★★★★★ — Sahil Panchal
GAMEPL's Student

“ Best School for the Animation, VFX and Game Development & Designing. Faculty is very good and Teach very well then the other Institute. Faculty Teaches in Detail and clear all the doubt of the students.”

★★★★★ — Foram Sanghvi
GAMEPL's Student

“ Best institute I've ever found. It gives best knowledge about the development and designing compares to other institute. They gives ideas and more depth knowledge about the Game Industry from past to present situation of these Industry.”

★★★★★ — Darshan Panchal
GAMEPL's Student
