GENERATION**
”

LEARN TO MAKE
GAMES LIKE

MINECRAFT

ROBLOX

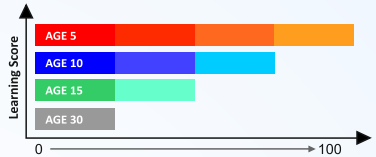

Jr.CODER+

GAMES & APPS CODING COURSE
FOR **SMARTER KIDS**

Age group 8 - 16 years

“Your kids can learn logic, structure, sequence and creative expression better than grownup students”

NASA study identified that kids peak in creativity at age 6, followed by a gradual decline as they grow up. Kids learn faster and can remember longer. Coding is the future and kids should be introduced as early as possible. Coding is a fun tool for kids to exercise their desire to build, curiosity to question, imagination to explore - the traits that will serve any child well in nearly any career, in every hobby, and in life.

Jr.CODER+

Classroom & online both options are available

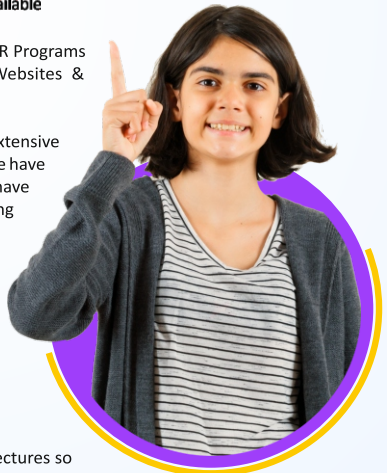

Learn Coding With Game Institute's JrCODER Programs and Learn to Publish your Own Apps, Websites & Games.

This course is developed with years of extensive work in the field of teaching & mentoring. We have trained students of various age groups. We have incorporated all our learning in the teaching methodology in this course, to make it easy, fun & result oriented.
